Kadiri Talitu .I.

SOFTWARE ENGINEER

I am a highly motivated Software Engineer with an impressive 7+ years of hands-on experience in developing innovative solutions and delivering exceptional results. Skilled in both front-end and back-end development, with a strong focus on robust architectural design, creating user-friendly interfaces and optimizing performance. I have a proven track record of driving project success, improving software functionality, and enhancing the overall user experience.

TEAM LEAD ENGINEER ZOJATECH LIMITED

Aug. 2023 – Present

- Scaled our fintech product to be able to handle ~2,000 concurrent requests per second.
- Developed an in-house API documentation solution for the company, saving them ~\$6,000/per year.
- Led the development and release of the MVP of two products (Mance and Smartsend).
- Mentored and trained my teammates to become better engineers.

TEAM LEAD ENGINEER SELSTACK LIMITED

Mar. 2021 – Nov. 2023

- Led the design and implementation of the entire system architecture, encompassing both backend and frontend components.
- Actively contributed to the company's efforts in creating a platform that is rock-solid, scalable, and robust, providing a unified solution to address both e-commerce and Customer Relations Management (CRM) needs.

FULLSTACK ENGINEER AFRIADVERTS LIMITED

Nov. 2017 – Aug. 2020

- Built an Ad network software for the organization which was being used by both advertisers and publishers.
- Designed and implemented the entire system architecture to ensure scalability and maintainability.
